### Description

The Blazer Big Buddy produces a massive flame for its overall compact size. It boasts a 2500 degree "turbo flame" and up to 60 minutes (low flame) of continuous burn time which is pretty spectacular. It sits at about an average height among most tabletop torches at 8.5" tall and 6.2" deep, from nozzle to trigger. We love Blazer torches. We love how they're built and how they perform. No cheap parts that wear out over time and a consistent ignition and flame from your first use to your 10,000th (and beyond... really.) use. You also get famous service and support directly through Blazer, or us, on any warranty issues or concerns.

The Big Buddy is Blazer's latest and greatest table top torch offering a large steady flame for an affordable price. We know you'll be happy with your purchase on this one, but if you have any questions don't hesitate to ask.
